

EKOMJAH DENIS

FULL-STACK DEVELOPER

 ekomjahedet@gmail.com  github.com/ekomjah  linkedin.com/in/ekomjah  x.com/ekz_dee  [Portfolio](#)

SUMMARY

Full-stack developer with 2+ years of hands-on experience learning and building projects, focused on **creating** practical web applications with clean code and collaborative problem-solving. My skills span frontend and backend, from optimising page-load performance to building, deploying and scaling full applications, including design systems, state architecture and authentication. **I collaborated** with other developers on **team** projects and made noteworthy contributions to numerous open-source repositories. Eager to apply technical skills and open-source experience to drive innovation in a fast-paced environment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: Figma, React, Next.js

Backend: FastAPI, Express, Hono, AWS Lambda, RESTful APIs, Serverless Architecture

Cloud & Infrastructure: AWS S3, Terraform, PostgreSQL, MongoDB, SQLite

Tools: Git, CI/CD with GitHub Actions, Docker, AWS, Notion, Jira, Obsidian

SOFT SKILLS:

Problem Solving • Open-source collaboration • Independent work • Continuous learning • Resilience

SELECTED PROJECTS

Captura — Screenshot Capture & Search SaaS

React, TypeScript, Python(FastAPI), AWS (S3, Boto3), Tesseract(OCR), Terraform, Clerk, PostgreSQL, SQLAlchemy

- Built a workflow that turns raw screenshot uploads into searchable, structured cloud assets for QA engineers and developers.
- Implemented image upload and processing concepts, including optimised WebP/JPEG variants, OCR text extraction with Tesseract, and searchable/downloadable assets.
- Further optimized the production-ready app by implementing background job queuing for large asset uploads.

Dortl — A URL shortening service and link management platform

Built with the BHVR Stack (Bun, Vite, React(TypeScript), Hono.js), SQLite, DrizzleORM, nodecron

- Built a minimal yet reliable platform for managing personal/social media links.
- Implemented a tiered management system with restricted anonymous link creation (2 links, 24-hour expiry) and authenticated access to customisable link expiry times, click analytics and automated db daily cleanup of expired links using node-cron.

Penny Wise — Financial Literacy Learning Platform

React, JavaScript, Express, MongoDB, Mongoose, JWTs

- Contributed to a learning platform for children and preteens, teaching saving, budgeting, and thoughtful spending through short, accessible lessons and courses.
- Worked on a React user experience from ui design logic to auth implementation
- Collaboratively implemented a clearly scoped Express backend with clearly defined database Schemas

EDUCATION

University of Uyo — Mechanical Engineering

2025 – Present | Entering second year
